

Advancing
the power of
diagnostics,
now and into
the future

 QuidelOrtho™

At QuidelOrtho, we envision a world where individuals, families and communities have the insight and clarity to spot trends sooner, respond quicker and confidently chart their course to better health

A future where

- We foster lifelong well-being in real time
- Disease is predicted and prevented before it takes hold
- Communities can anticipate, prepare and protect the health of their populations
- Diagnostics solutions are readily accessible where and when they are needed most

Intelligent
diagnostics
hold the power
to unlock
this healthier
future

We've relentlessly pursued the unknown for many years, blazing trails in testing, tracking and analysis

This timeline reflects our history of firsts;

Our solutions are powering diagnostics *across the healthcare continuum from home to hospital, lab to clinic*

Delivering
on-demand testing
and actionable
results, whenever
and wherever
they're needed

Our Point of Care Portfolio

From at-home tests with digital support services to small footprint solutions that move patients swiftly through healthcare settings – we bring real-time insight closer to patients at critical points of need

**QuickVue® At-Home
OTC COVID-19 Test**
Accurately detects the
SARS-CoV-2 Omicron
variant (among others)

**QuickVue® Rapid
Lateral-Flow Tests**
A family of rapid, visually
read, lateral flow tests
to produce accurate
results in minutes

Sofia® 2 SARS Antigen+ FIA
Small bench-top analyzers
that take rapid testing
to a new level using proven
lateral-flow technology
and advanced
fluorescence chemistry

Triage® System
Comprehensive test menu that
provides the diagnostic answers
needed to assist in making rapid,
cost-effective treatment decisions

Providing pinpoint
precision to see
the unseen

Our Molecular Diagnostics Portfolio

Using the building blocks of life to develop platforms that aid in the rapid delivery of treatments, we are setting a new standard in diagnostics, from rural clinics to big city health systems

Lyra® Real-Time PCR Assays

Open platform, high-throughput molecular testing solutions that detect and identify infectious diseases with minimal steps

Solana® Molecular Testing Platform

Simplified platform that uses our proprietary helicase-dependent amplification (HDA) with fluorescence detection to make diagnosing infectious diseases faster and easier than before

Savanna® Real-Time PCR Testing Platform

Simple, sample-to-result operation that can run up to 12 unique analytes from a single patient sample in approximately 25 minutes

Powering up labs
and transforming
global health,
one community
at a time

Our Labs Portfolio

To meet the changing needs of diverse populations, we empower labs, doctors, health networks and governments with the accuracy, insights and technologies that enable more informed decision-making and coordinated community care

Customer Service Program

The evolution of how our award-winning service, expertise, technology and data-driven solutions come together to create a more effective, efficient lab so our customers can focus on improving patient outcomes

Vitros® Systems

Clinical diagnostic testing systems that deliver fast, accurate, reliable test results for the clinicians and patients who need them

Vitros® Automated Testing Solutions

Flexible and scalable automation solutions for labs of all sizes

[Learn about our complete Labs offerings](#)

Activating global health intelligence when life itself is at stake

Our Transfusion Medicine Portfolio

As the global leader in immunohematology, we connect and activate a world of serological expertise and data to defuse risk, optimize matches and deliver safe transfusions

Customer Service Program

The evolution of how our award-winning service, expertise, technology and data-driven solutions come together to create a more effective, efficient lab so our customers can focus on improving patient outcomes

Ortho Optix™ Reader

Semi-automated pre-transfusion card reader designed to automate reaction grading and elevate labs' performance to higher levels

Ortho Vision® Analyzers

Automated pretransfusion testing platform that automates over 99% of workload in the blood bank without compromising turnaround time

Ortho® Workstation

Paired with the Ortho Optix Reader, provides a complete semi-automated testing platform, with combined incubation and centrifugation to provide an even smaller footprint in the lab

And while our individual solutions continue to advance diagnostic care across the continuum, *this is just the beginning*

A decorative graphic on the left side of the slide, consisting of various white rounded squares and rectangles of different sizes and orientations, some overlapping, set against a solid purple background.

Together we are forging a new
diagnostic frontier where ...

Our Capabilities Converge

Where insights and solutions know no bounds, and the best of our science, technology and innovation is unleashed to answer new needs and offer new possibilities

Experts and Expertise Build and Invent Together

Allowing ideas to collide from across the continuum to anticipate and address the complex needs of a rapidly changing healthcare environment

Systems Seamlessly Connect

Data and intelligence are shared across ecosystems from home to hospital, clinicians to health systems enabling a more complete picture and informed path to be illuminated for us all

The QuidelOrtho Way

A culture driven by unwavering dedication to guide our future forward

- We believe we are better together, in a team where everyone is welcomed to thrive, where diverse perspectives are encouraged and authenticity is expected.
- We are committed to our employees first and we prioritize actions that support happy, inspired and engaged team members.
- We operate with speed by focusing on the things that matter most. We believe in executing with excellence, having courage to take risks and always striving to be better. Be bold. Be brave.
- We give back to our communities and build enduring customer relationships. We imagine a better future, explore ideas and build life-changing technologies. Together, we enrich and save lives.
